EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew W. Chu on February 12, 2008.

The application has been amended as follows: Applicant has agreed to cancel amended claims 30-35 in order to secure an early date for the present invention. In the First Office Action, claim 16 was indicated as objected to but allowable if rewritten in independent form including all the limitations of claim 14. Applicant rewrote claim 16 (amended claim 30) including all the limitations of claim 14 and thereby made amended claims 31-35 depend from claim 30. After further review by the Examiner, it was found that amended claim 30, (previously claim 16) did not contain sufficient structure to distinguish itself from the prior art.

Applicant was informed of this oversight and elected to cancel claims 30-35 in order to obtain protection on the allowed claims 21-29.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:
2. The objections to the drawings and specification from the First Office action have been addressed and are now in condition for allowance.
3. The rejection to claim 1 under 36 USC sec. 112 has been addressed and is now in condition for allowance.
4. Regarding amended claims 21-29 being allowed. The allowed claims are distinguishable from the prior art. Independent claim 21 recites the element "rigid ring," it is this element and its association with the cap that distinguishes the present invention from the prior art. The prior art found contains similar structure; however, the prior art discloses and teaches attaching the cap directly to the anchor. In the present invention as claimed, a rigid ring with a notch exists within the anchor opening. The cap is retained by the rigid ring as opposed to the anchor member as taught in the prior art. This form of attachment means is neither disclosed or taught in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."
